Oregon State University Investment Policy

I. Purpose of the Investment Policy

The purpose of this document is to identify the policies for prudent investment of Oregon State University (“University”) funds by providing guidelines for suitable investments while maximizing the efficiency of the University’s cash management program.

The investment policies and practices of the University are based on state law and prudent money management. All funds will be deposited and invested in accordance with this Policy and all statutes, ordinances and policies governing the University.

II. Scope

It is intended that this policy cover all funds (except quasi-endowment, endowment, and retirement funds) and investment activities under the direction of the Oregon State University Board of Trustees (Board).

III. Prudence

The Vice President for Finance and Administration, Associate Vice President for Finance and Administration and the Board are fiduciaries subject to the prudent investor standard. When investing, reinvesting, purchasing, acquiring, exchanging, selling, or managing public funds, a trustee shall act with care, skill, prudence, and diligence under the circumstances then prevailing, including, but not limited to, the general economic conditions and the anticipated needs of the University, that a prudent person acting in a like capacity and familiarity with those matters would use in the conduct of funds of a like character and with like aims, to safeguard the principal and maintain the liquidity needs of the University.

IV. Objectives

The primary objectives, in priority order, of the investment activities of the University shall be:

1. *Safety* — Safety of principal is the foremost objective of the investment program. Investments of the University shall be undertaken in a manner that seeks to ensure preservation of capital in the portfolio. The University shall seek to mitigate credit and interest rate risk.

- a. Credit Risk. The University will minimize credit risk, the risk of loss due to the financial failure of the security issuer or backer, by:
 - Pre-qualifying the financial institutions, broker/dealers, and advisers with which the University conducts business.
 - Diversifying the investment portfolio so that potential losses on individual securities will be minimized.
 - Actively monitoring the investment portfolio holdings.
 - b. Interest Rate Risk. The University will minimize the risk that the market value of securities in the portfolio will fall due to changes in general interest rates by:
 - Structuring the investment portfolio to provide enough liquidity to meet cash flow needs.
 - Maintaining a conservative duration target.
 - Structuring the portfolio to consist largely of securities with active secondary or resale market.
2. *Liquidity* — The investment portfolio of the University will remain sufficiently liquid to enable the University to meet its cash flow requirements including but not limited to payroll, payroll related liabilities, accounts payable, and debt service.
 3. *Return on Investment* — The investment portfolio shall be designed with the objective of attaining a market rate of return throughout budgetary and economic cycles, taking into consideration the safety and liquidity needs of the portfolio.

V. Delegation of Authority

The management responsibility for the investment program is hereby delegated by the University Vice President for Finance and Administration to the University Associate Vice President for Finance and Administration, with oversight by the University Provost and Executive Vice President and the University Vice President for Finance and Administration. The Associate Vice President will monitor and review all investments for consistency with this investment policy. The Associate Vice President may delegate investment decision-making and execution authority to an investment advisor. The advisor shall follow the policy and such other written instructions as are provided.

VI. Ethics and Conflict of Interest

Officers and employees involved in the investment process shall refrain from personal activity that could conflict with the proper execution and management of the investment program, or that could impair their ability to make impartial decisions. Officers and employees shall disclose any material interests in financial institutions with which they conduct business. Disclosure shall be made to the governing body. They shall further disclose any personal financial/investment

positions that could be related to the performance of the investment portfolio. Employees and officers shall refrain from undertaking personal investment transactions with the same individual with whom business is conducted on behalf of the University.

VII. Permitted Investment Instruments

Where this section specifies a percentage limitation for a particular security type, that percentage is applicable only on the date of purchase.
