Rebecca Mathern, Associate Vice Provost and University Registrar

Heidi Sann, Associate Vice President for Finance and Controller

Lisa Templeton, Vice Provost for Educational Ventures

The Administrative Modernization Program Steering Committee supports SP4.0 Action 20:
Integrate and simplify technology systems, data practices, and policies to increase our organizational agility.

As described in the [AMP Information Sheet](#) and [OSU AMP Steering Committee Charge](#), the Administrative Modernization Program (AMP) will replace OSU's outdated core administrative IT systems, increase capacity, standardize processes and tools, and streamline support capabilities. It includes an updated data ecosystem, additional automation, and implementation of new cloud-based technologies.

This committee will serve as the governing committee for AMP, ensuring adherence to appropriate design and guiding principles, representing the efforts to stakeholders, and communicating enterprise needs and investment priorities to AMP implementation and project teams.
